UI UX Presentation

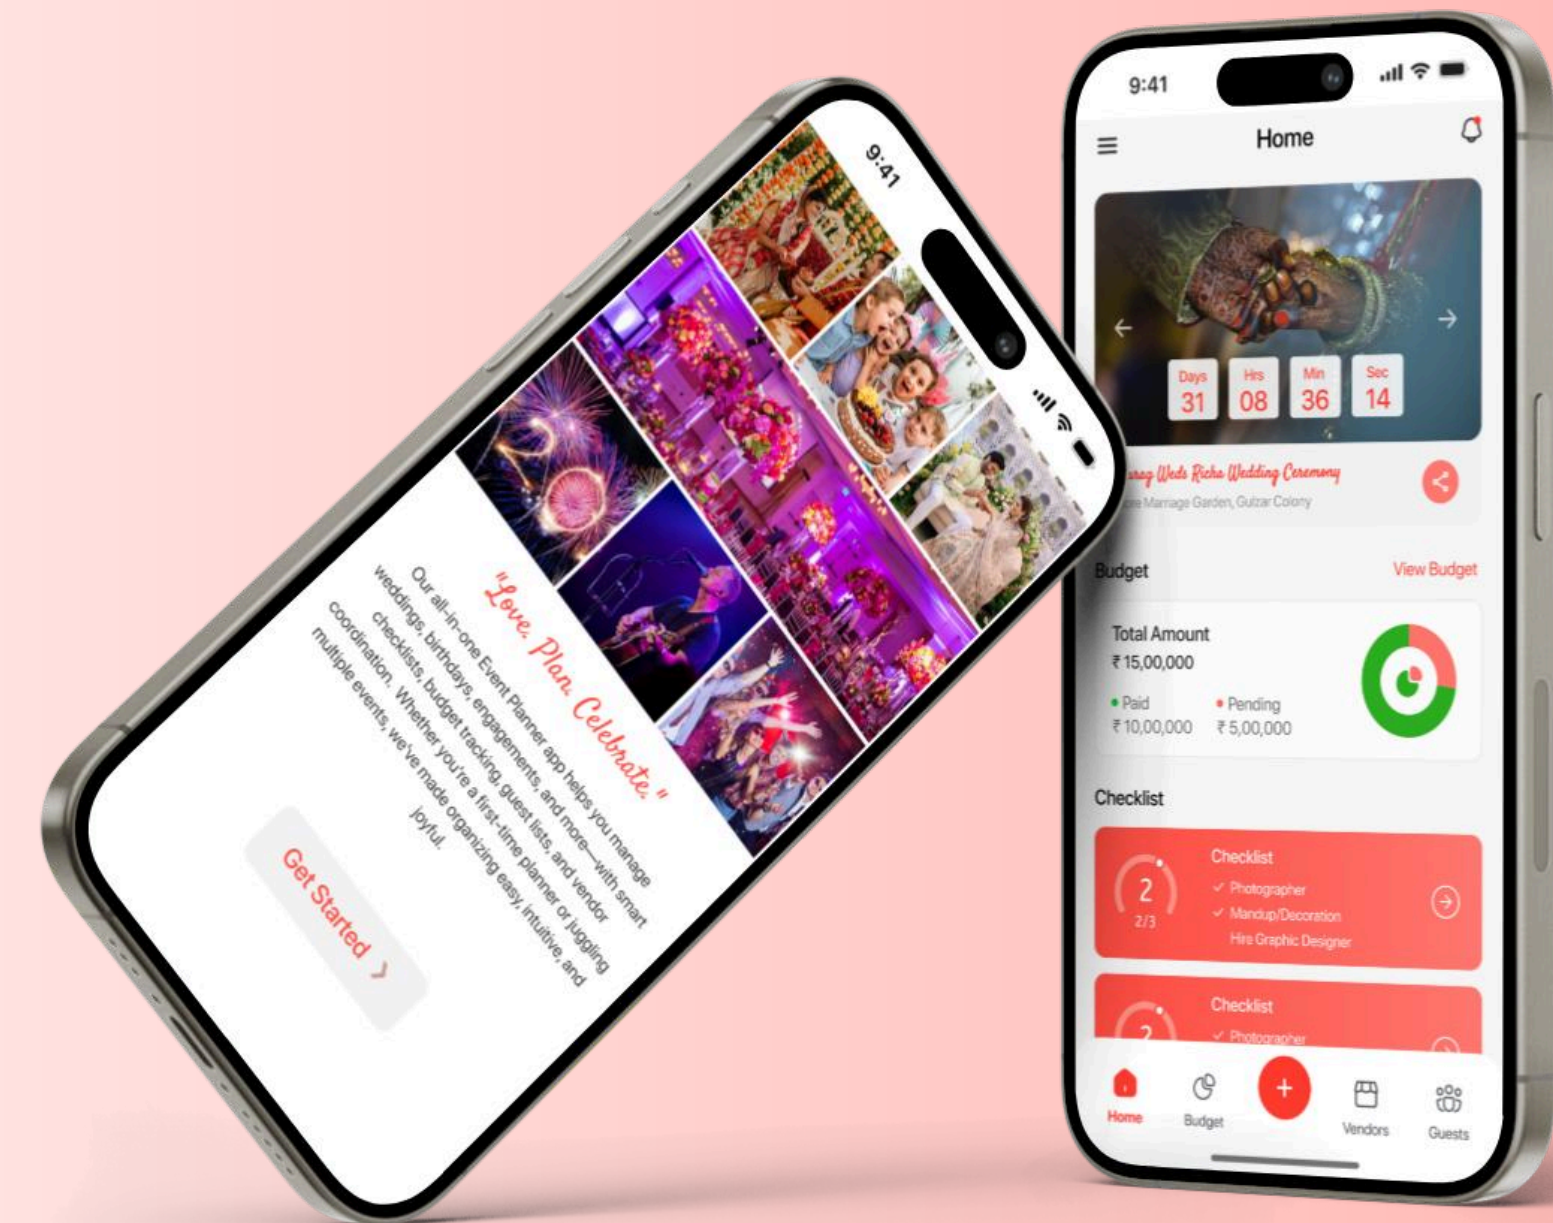

Event Planner App

Event Planner is a smart event planning app tailored for non-professional users to plan weddings, engagements, and other events with ease. The app focuses on simplifying budgeting, guest management, vendor coordination, and planning checklists.

Tools

01 | Project Overview

Problem Statement

“Planning events is time-consuming, scattered, and stressful—especially for people who aren’t professional planners.”

Solution

Event Planner is a user-friendly mobile app designed to help individuals—especially non-professional planners—organize weddings, birthdays, engagements, and more with ease. From managing budgets and guest lists to coordinating vendors and checklists, the app simplifies every step of event planning. Our goal is to reduce stress and bring joy back into planning special moments.

My Role

Sole UI/UX DESIGNER

Deliverables

Presentation (PPT) – Prepare a minimum 12- Slide presentation covering:

- 1. Importance of the project
- 2. Future scope
- 3. Detailed explanation of your work
- 4. Documentation Report – Include:
 - Project overview
 - Problem statement
 - Implementation details
 - Challenges & solutions

WEEK 04

Design a Mobile App for Fundraiser

DESCRIPTION : Create a mobile app that helps users plan and manage events (e.g., parties, weddings, conferences). Features might include a budget tracker, guest list manager, vendor booking, event reminders, and social sharing. The app should have a delightful user experience with an easy-to-navigate interface and beautiful visual design.

Technologies Should Used :

Design Tools: Figma, Sketch, or Adobe XD for UI/UX design.

Prototyping: Marvel App, InVision, or Figma for creating interactive prototypes.

Mobile Design: Use Material Design or iOS Human Interface Guidelines for platform-specific guidelines.

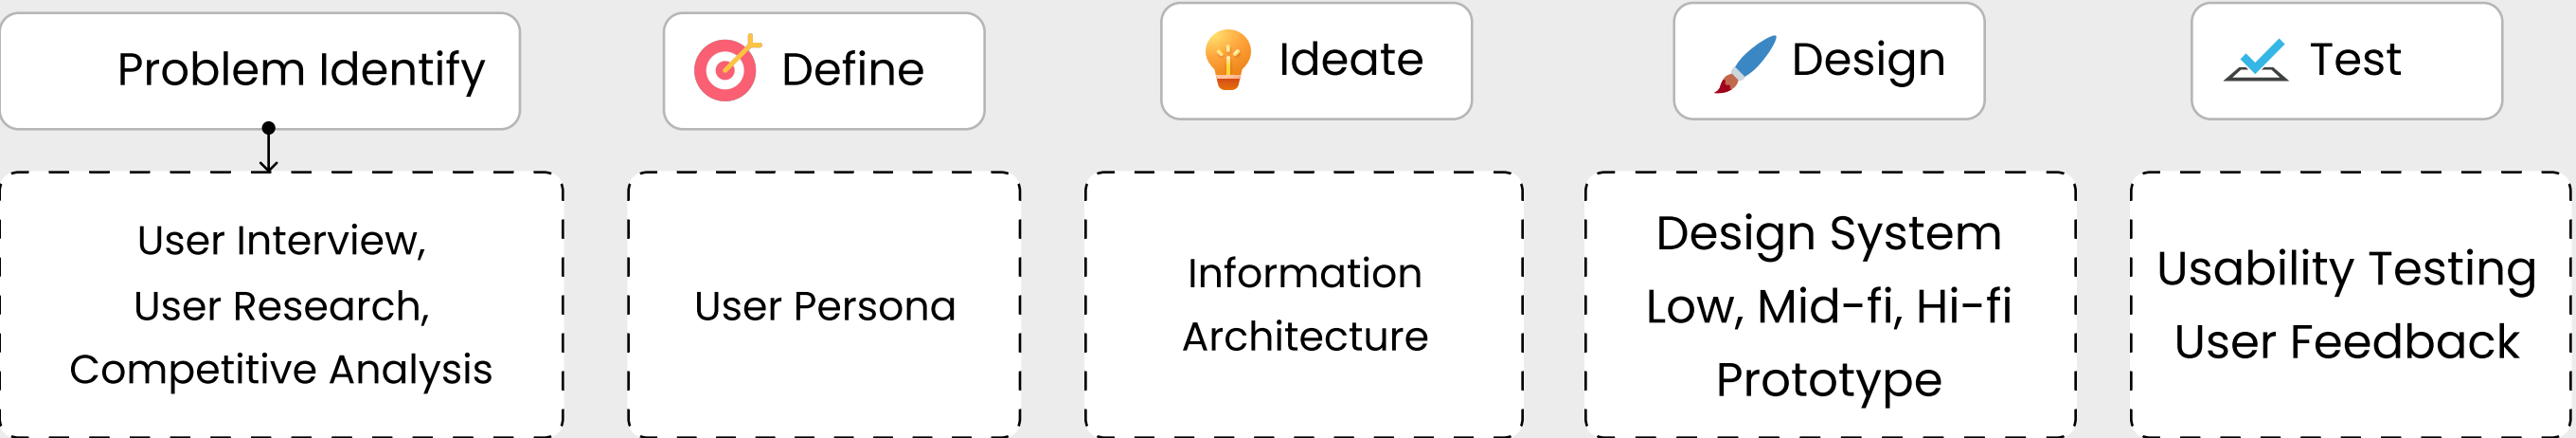

User Research: Conduct surveys and focus groups to understand user needs for event planning and organization.

Usability Testing: Test with real users to evaluate how intuitive the event creation and management flows are.

NOTE :

- The Project Should Be Completed before the deadline.
- The Project Should Be Submitted On GITHUB, LinkedIn.
- The code , Dataset should be sent via PDF on mail .
- The Post On Linked In Should Done as Video With @cothonsolutions Mentioned.
- The Link Of The Repository Should Be Given On The Mail.
- IF FAILED THEN THE PROJECT IS NOT CONSIDERED!!

Design Thinking Process

02 | Design Solutions & Target Audience

Challenges and Solutions

Challenges

- Designing for Both Professionals & Non-Professionals.
- Overwhelming Features in Existing Apps.
- Last-Minute Changes in Events (e.g. Guest Increase, Budget Overruns)
- Managing diverse user needs

Solutions

- Focused on non-event planners with simplified UI. Used onboarding to guide users step-by-step.
- Prioritized key features: Checklist, Budget, Guests, Vendors Used bottom navigation and clear labels to reduce complexity.
- Built-in flexibility: real-time guest count adjustment, Smart checklist & budget updates automatically based on user input.
- Created a minimal, icon-friendly design with tooltips. Kept language simple and culturally familiar

Target Audience

Age Group: 20–45

Professionals

- Wedding Planners
- Freelance Event Planners
- Corporate/Event Organizers
- Architects
- Entertainment & Media Companies Organizers
- Vendors & Service Providers

Non-Professionals

- Individuals
- Couples Planning a Wedding
- Birthday/Anniversary Hosts
- Students/Younger Users
- Parents (Planning Kids’ Events)

03 | Qualitative Research

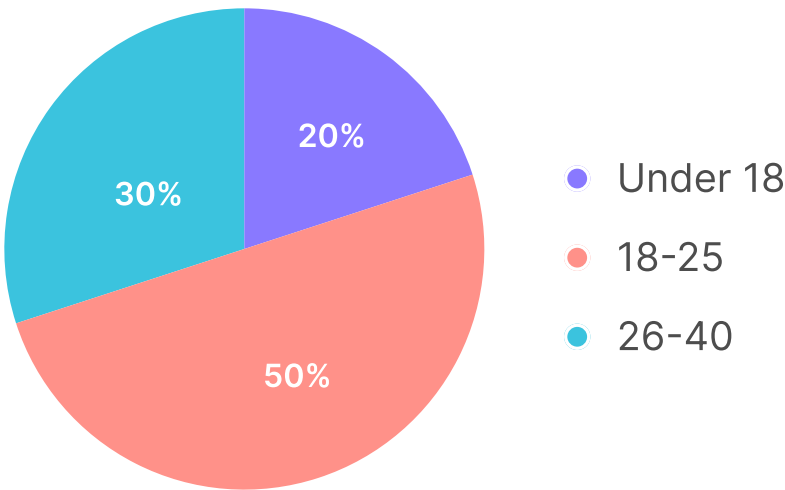

“I interviewed 5 non-event planners, both online and offline, to explore how they plan events and what problems they commonly face.”

1. How do you imagine or plan your wedding day from start to finish?
2. What difficulties or stress do you usually face while planning a big event like a wedding?
3. What are the most time-consuming or frustrating tasks when planning an event or wedding?
4. Have you ever used a wedding booking service or app before? What was the experience like?
5. If you had to plan multiple events or weddings at once, what do you think would be the hardest part to manage?
6. How do you usually keep track of things like tasks, budgets, guest lists, or vendors while planning something?
7. Can you share an example where you had to find a wedding vendor (like a photographer or decorator)? How did you search, and how easy or difficult was it?
8. How would you prefer to get suggestions or ideas for your wedding (Pinterest, Instagram, friends, etc.)? Why?
9. If a wedding planning app existed, what would make you want to use it regularly?
10. What features or help would make you feel less overwhelmed while planning a wedding?

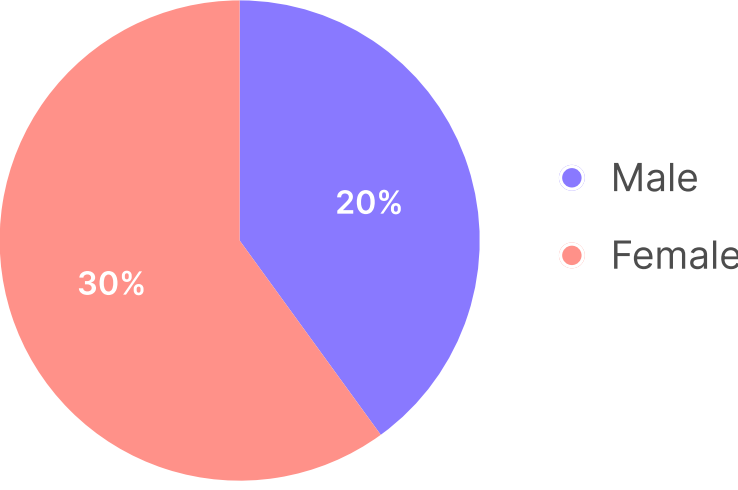

Google Form Questions & Answers

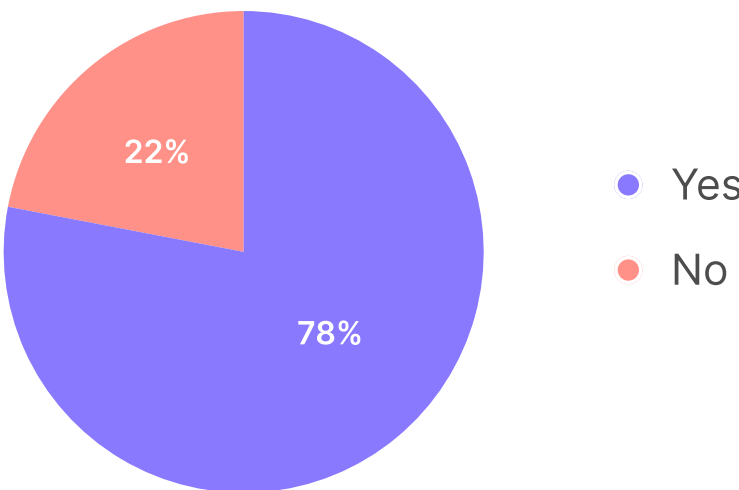

What is your Age?

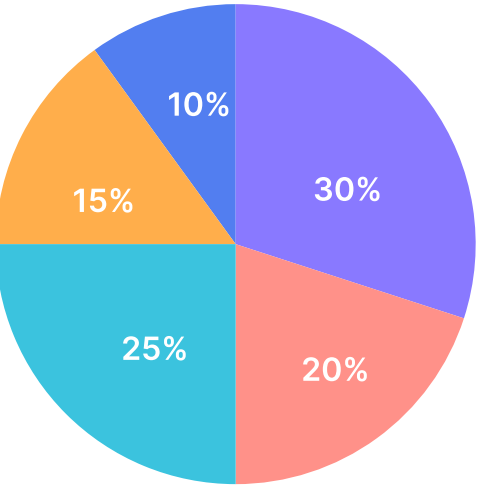

What is your Gender?

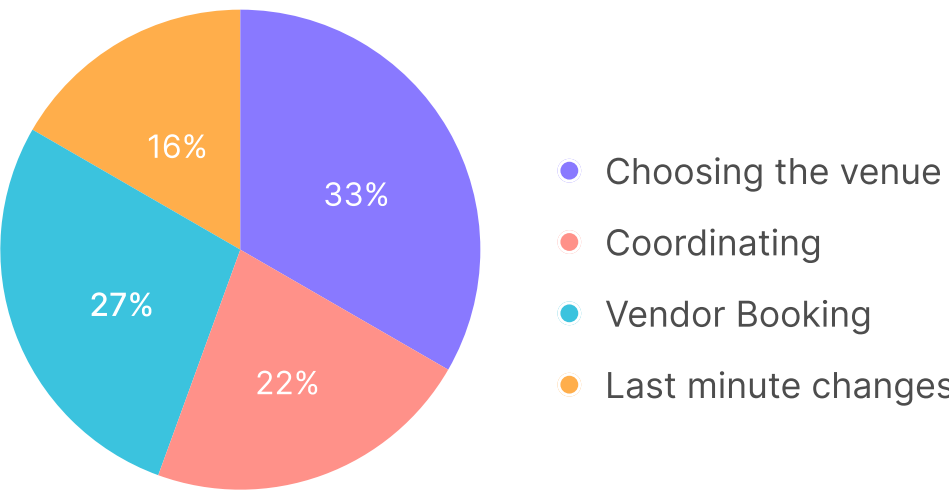

Have you ever helped plan a wedding?

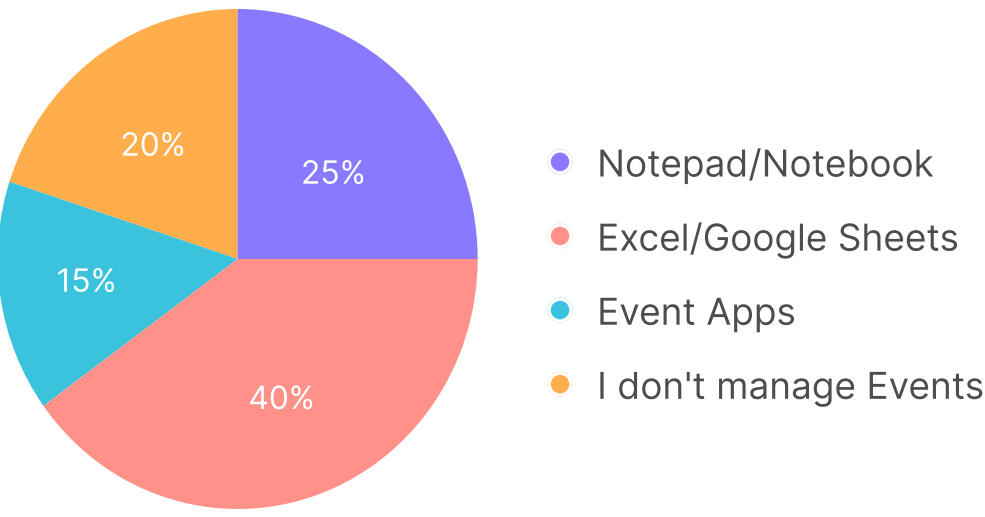

What part of wedding planning do you think is most difficult?

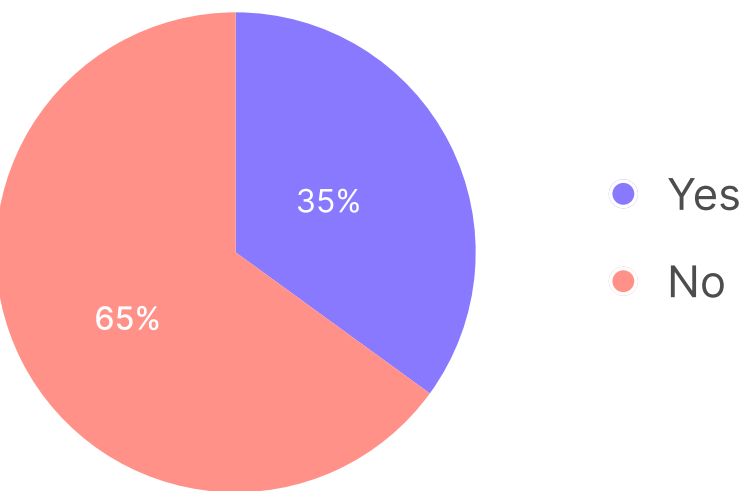

What Challenges do you face while arranging for your Wedding?

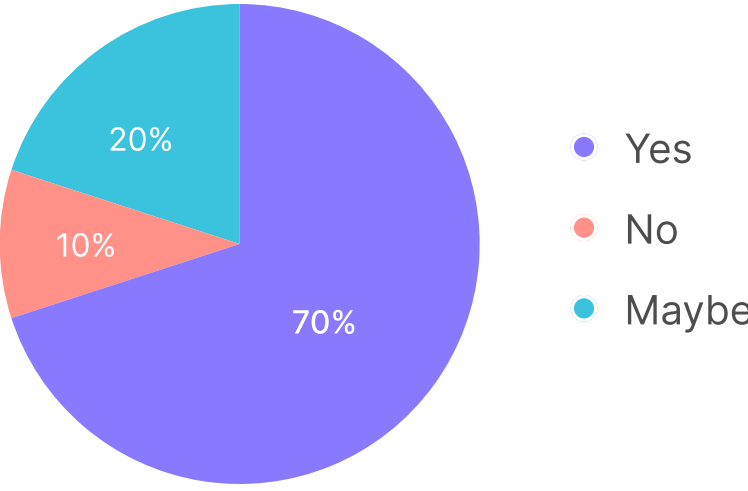

How do you currently manage event planning?

Have you ever planned or attended an event with international guests?

Would in-app expert advice or pro tips be useful to you?

05 | Playstore Review

Gathering real user feedback from existing event planning apps.

★★★★ 12 March 2025

For my mom's Last Party (she didn't want a funeral), I tried every party planner app available and this was the only one that was helpful. It's a bit basic and not always intuitive , but useful. I loved the budget and vendor sections. The checklist could display subtasks that needed to be done better. The schedule could use a "completed" option. The main reason I only gave it 3 stars is there is no food/menu planner. I made food planning work with the checklist w/subtasks, but it was a pain.

★★★★ 24 June 2021

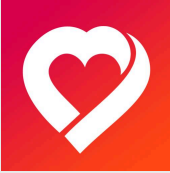

Just started using this app. I am very impressed so far. I find it even exciting to use. The only thing I can think of as an improvement would be in the Guest list, have "Confirmed" or "Declined" indicator. This app seems to be very well thought out, easy to use and I would recommend this app to others.

I am giving 3 star because this app is missing a very important feature, that is cloud backup and restore. Now almost every productivity app has a option of cloud backup and restore. Without this feature if the phone is lost or broken how can an user recover the data. At least Google drive integration is necessary.

★★★★ 8 July 2022

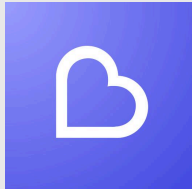

I wish you could share/add friends or family so they can see tasks and mark them complete or track the countdown with you. Otherwise, great planning app! I really like the interface and it's very user friendly. Quite a bit of ads which makes sense for the free version. Would pay for the app if you could share and if the app had widgets or notification reminder options.

★★★★ 5 October 2021

Nice app but it's unfortunate that I cannot share any pdfs, I've watched numerous videos to get a free export to pdf but nothing came out of it. I also thought that if I share the app itself, the receiver is able to get access to the same event details; That would be a nice feature.

★★ 29 July 2021

Could be AMAZING! I have 4 events in the next 3 months and this app would be perfect for managing those events if; *I could export to a PDF to give to my team of volunteers who could review it, revise it and add to it. *Have more than 1 event. (Answer is in Settings) *How can my team access the app to make changes? I emailed the developer Visionary Labs and asked them the questions above. They haven't did a update since 3-3-20 and they don't respond to reviewers questions. Hmm! 🤔

07 | User Persona

Name: Priya Sharma
Age: 31
Gender: Female
Education: MBA in Marketing
Occupation: Manager
Location: Bangalore
Status: Married

Personality:

- Eco-Friendly
- Tech-Friendly
- Organized
- Creative Thinker

Favorite Brands:

Bio:

Priya is a busy professional who often plans corporate events. She values smart tools that save time and help her stay organized with minimal hassle.

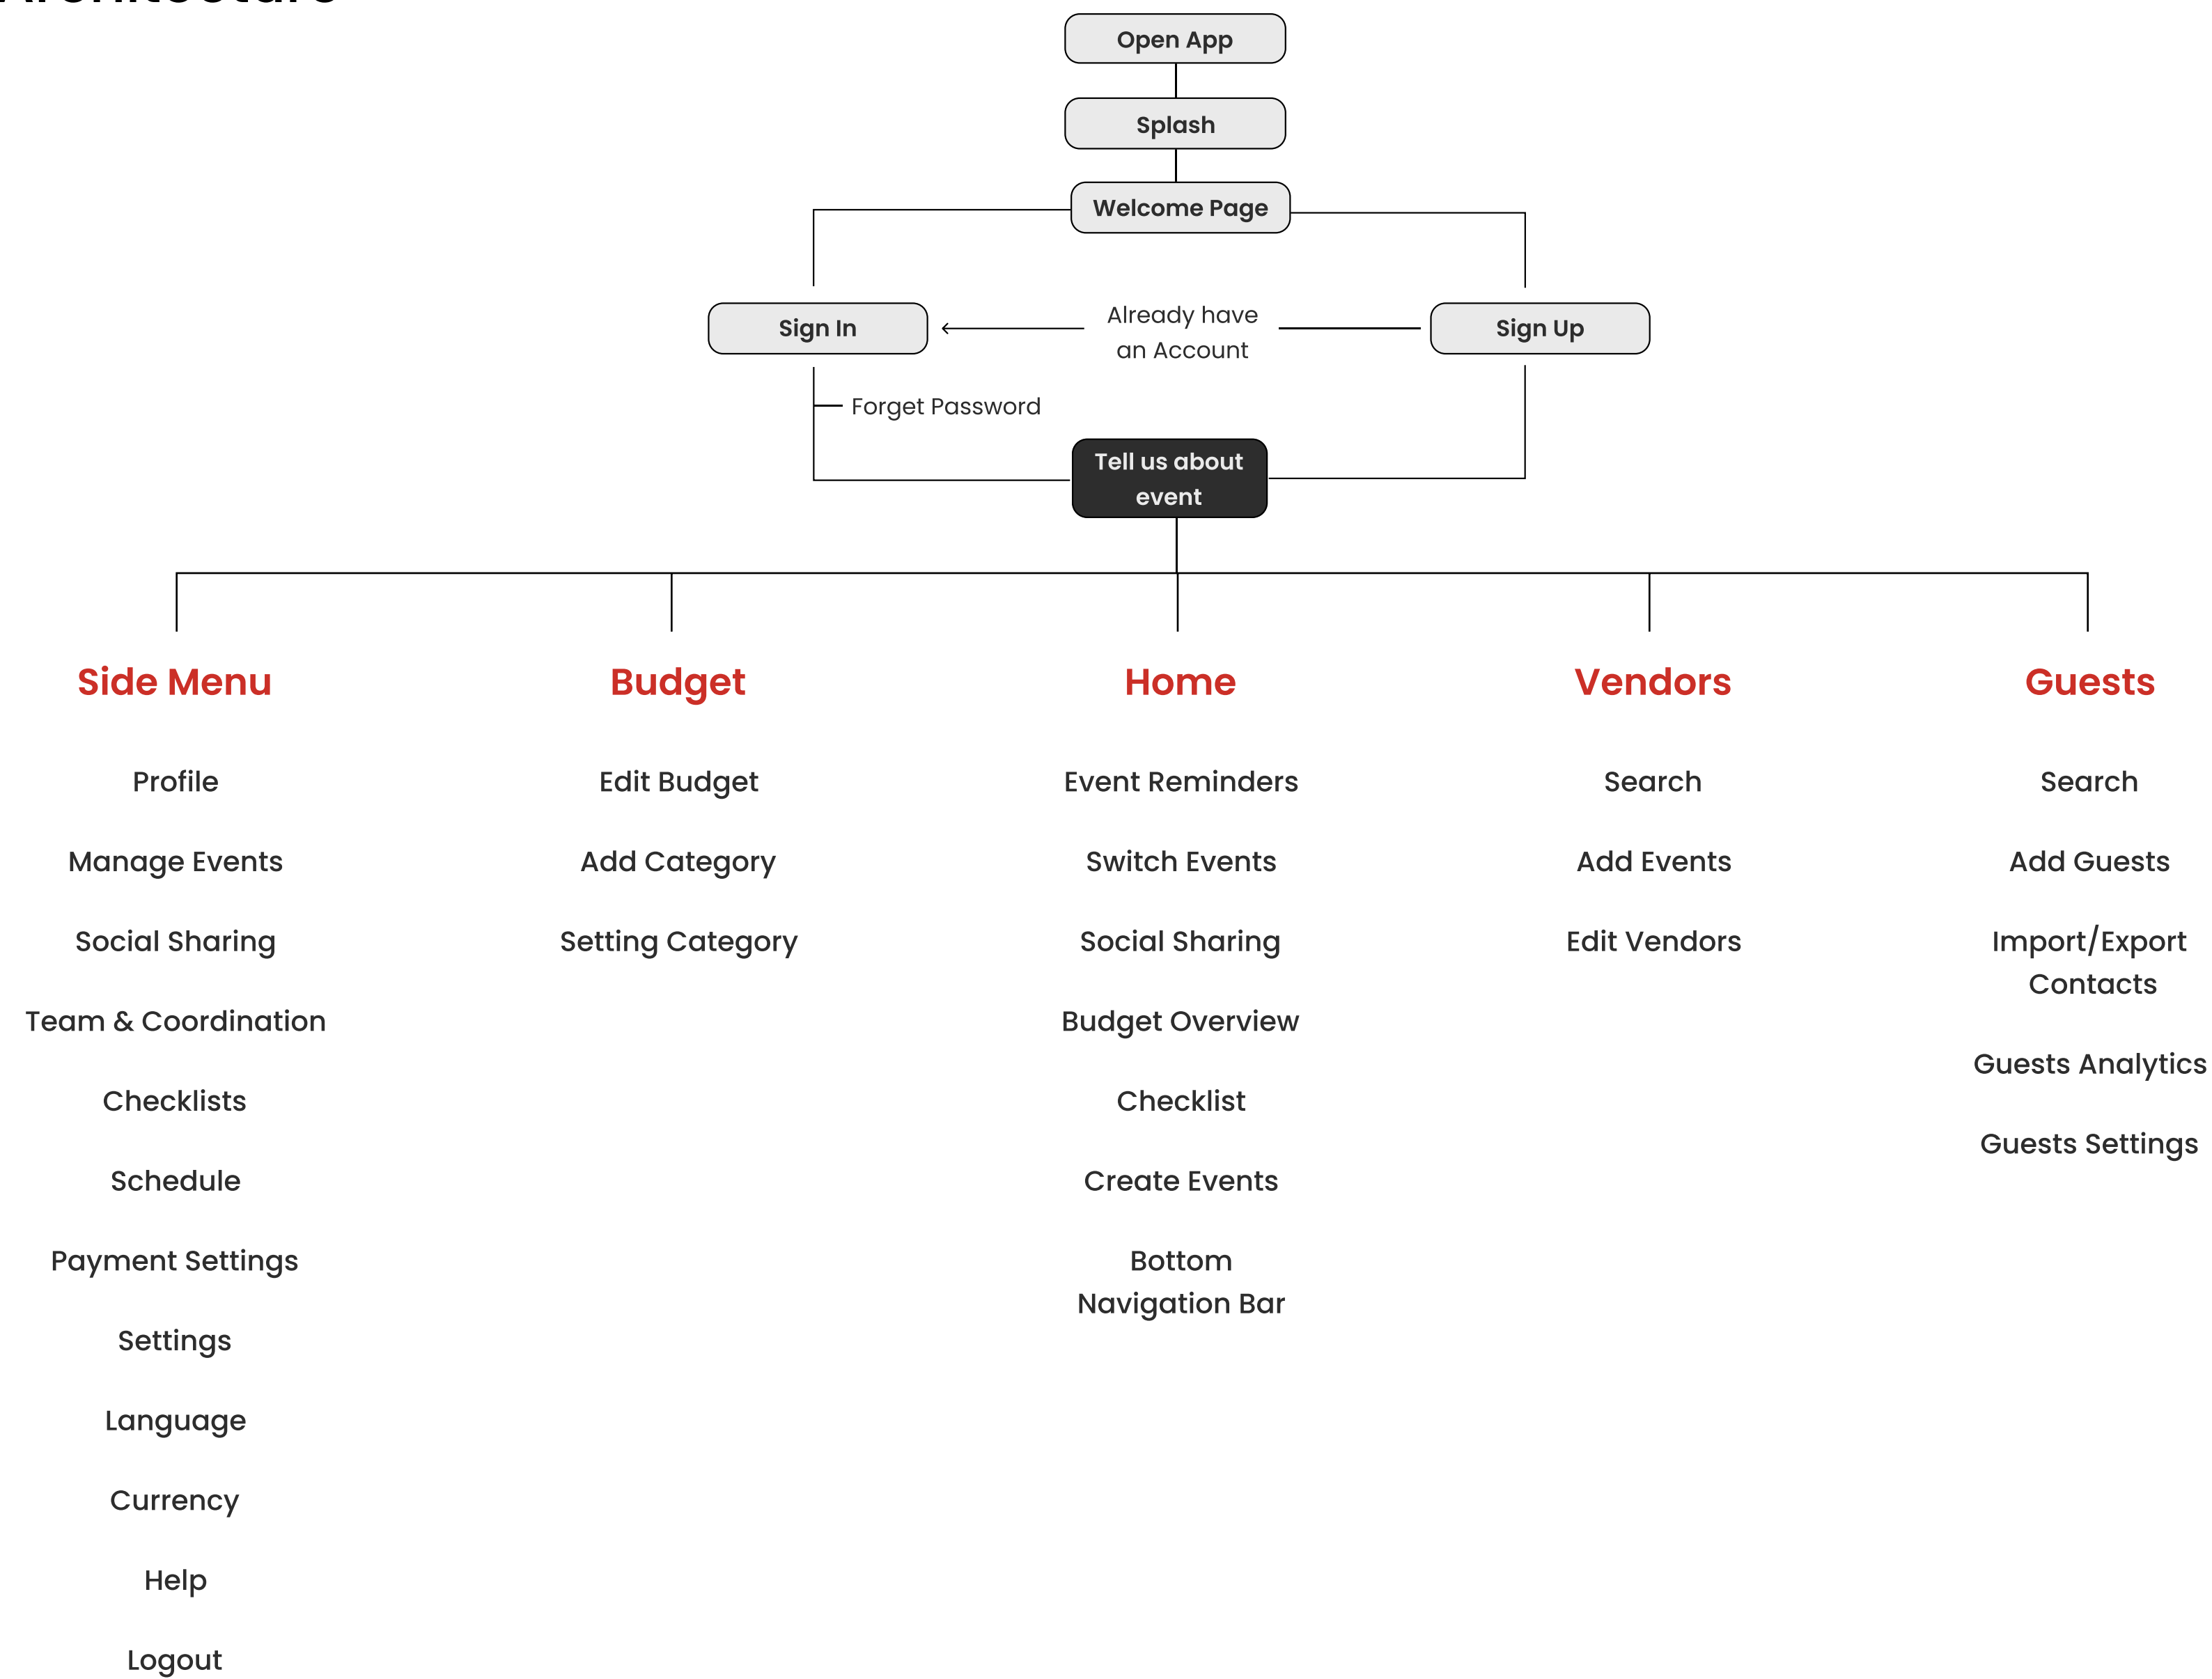

Frustrations:

1. Juggling multiple vendors through separate platforms.
2. Lack of templates for corporate event types.
3. Difficulty syncing schedules with team availability.
4. Inconsistent communication with vendors.
5. Poor visibility on event budget tracking and expense splits.

Goals & Needs:

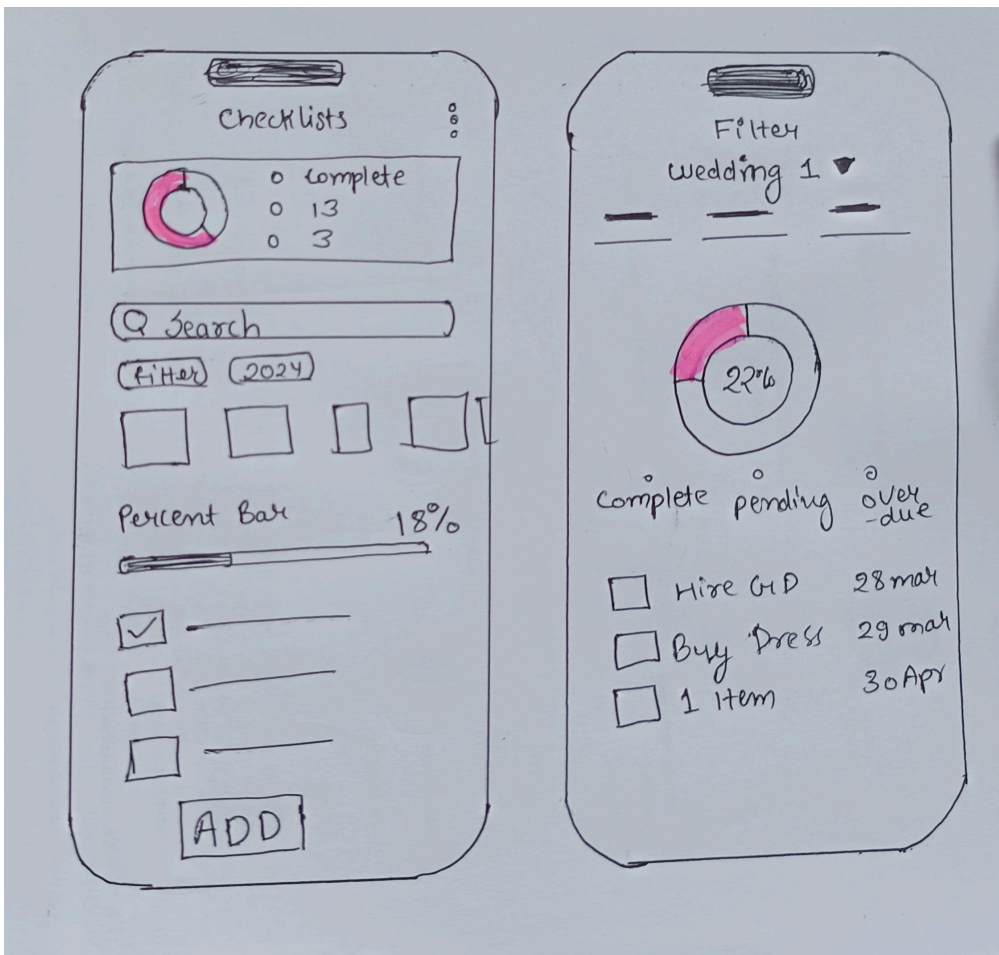

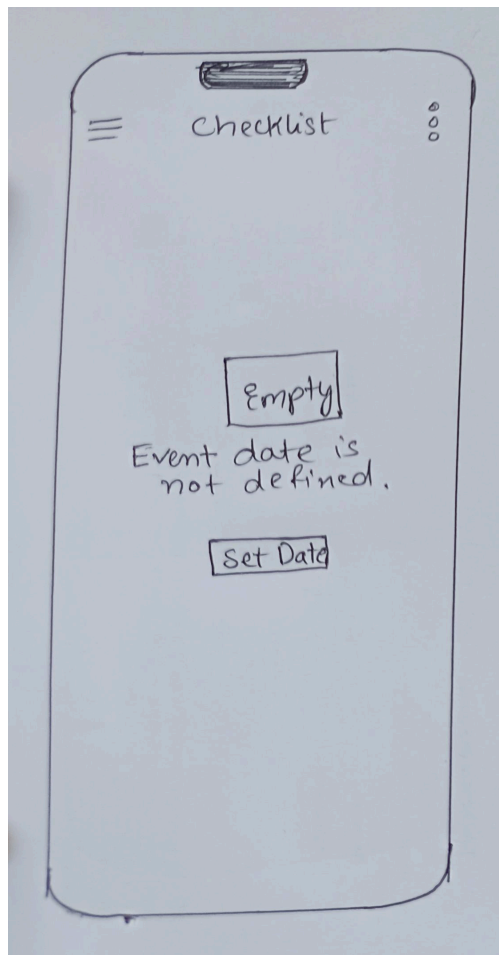

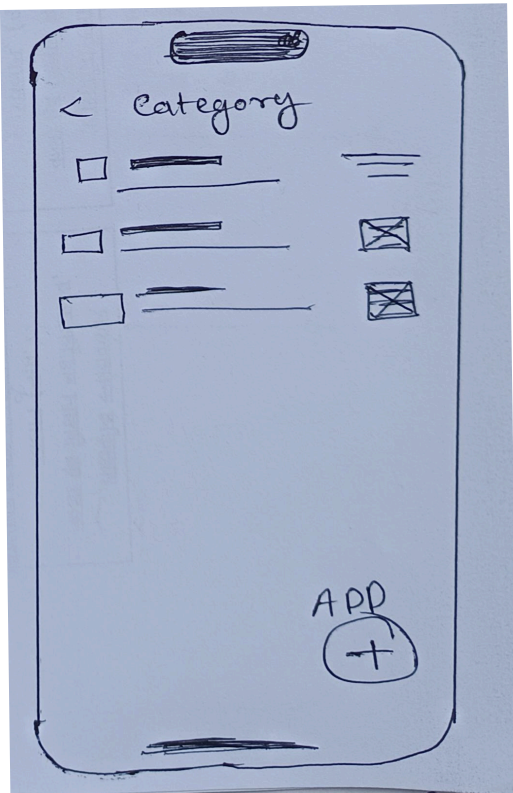

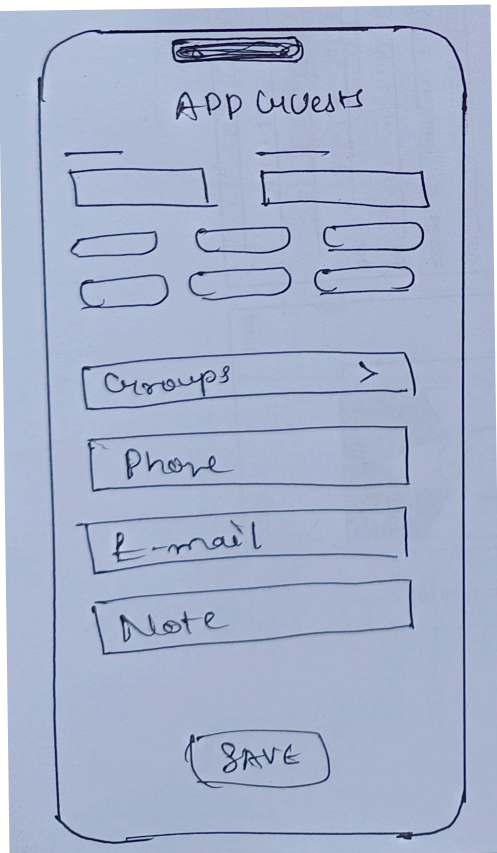

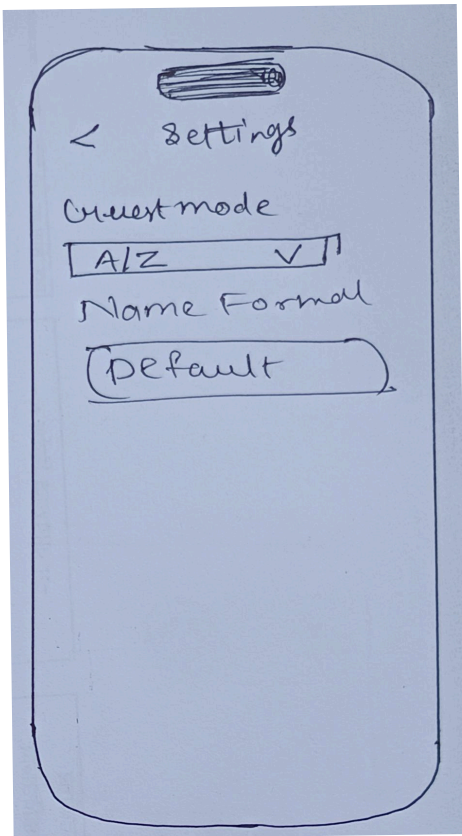

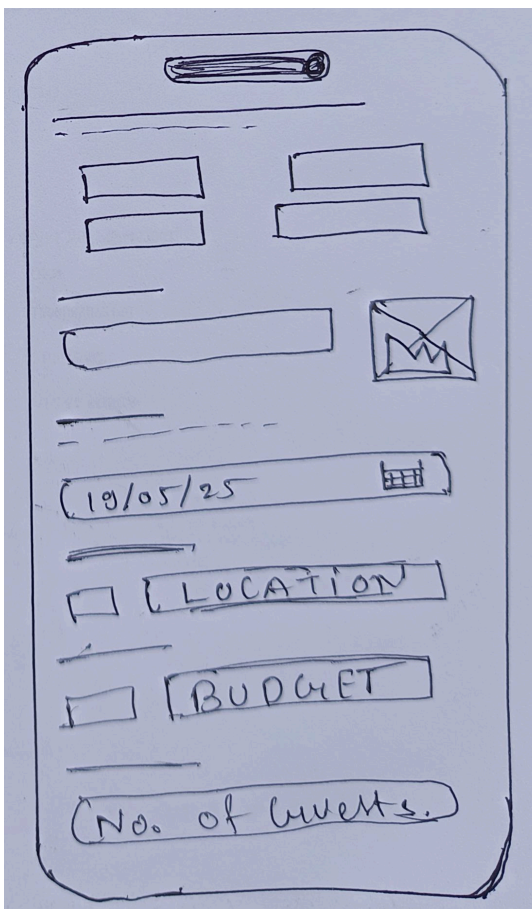

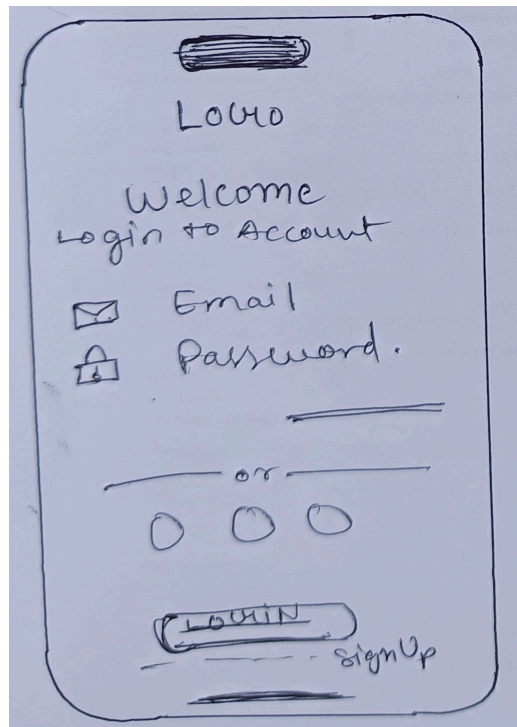

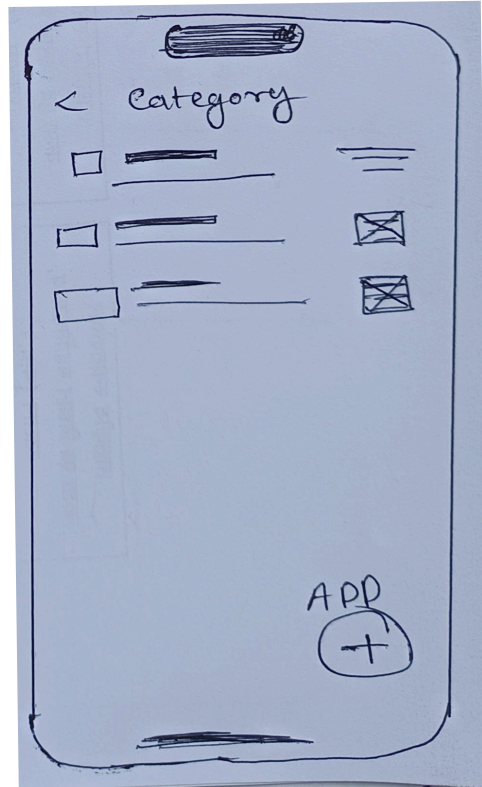

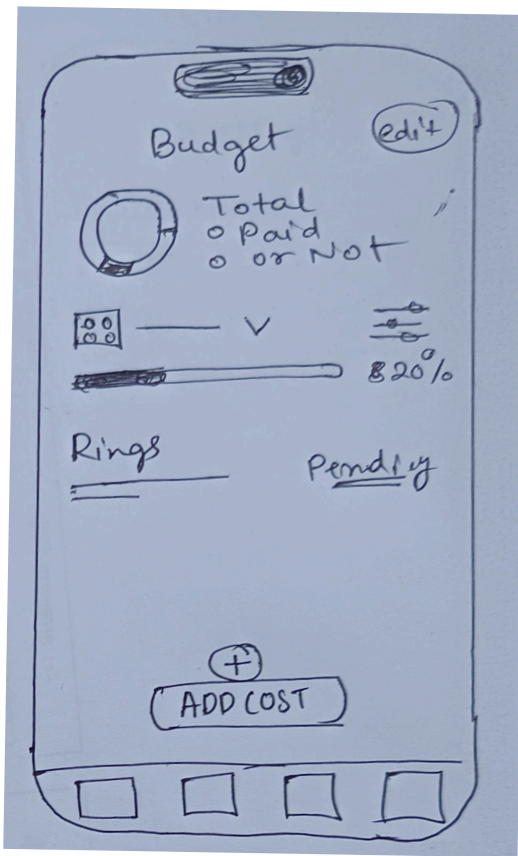

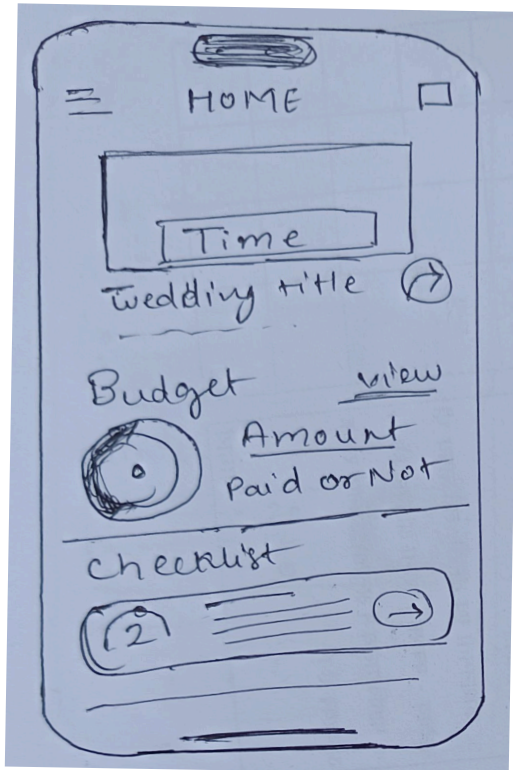

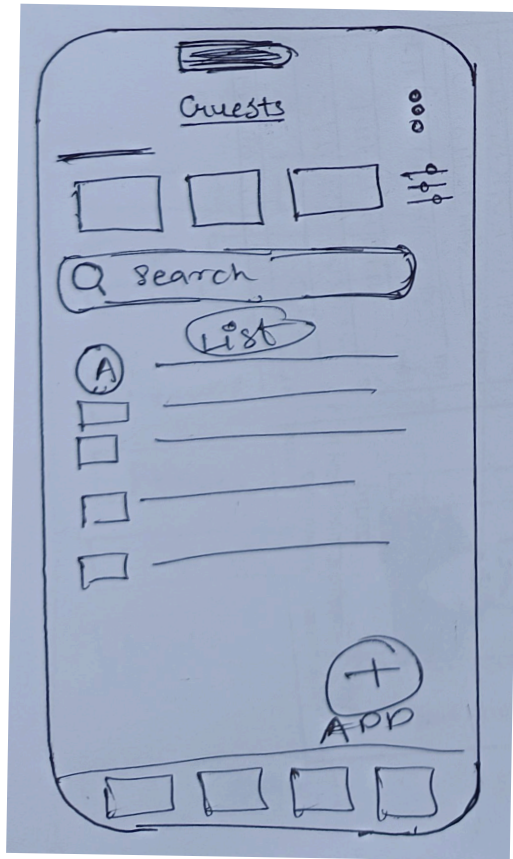

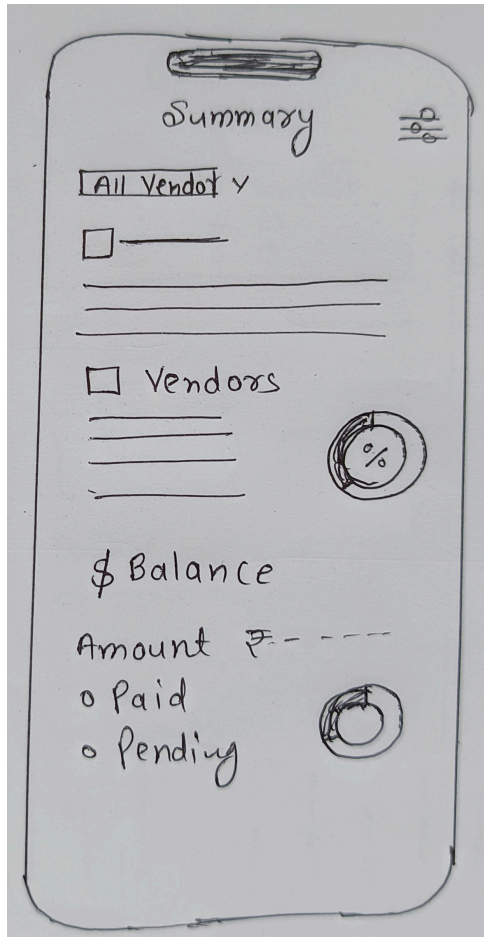

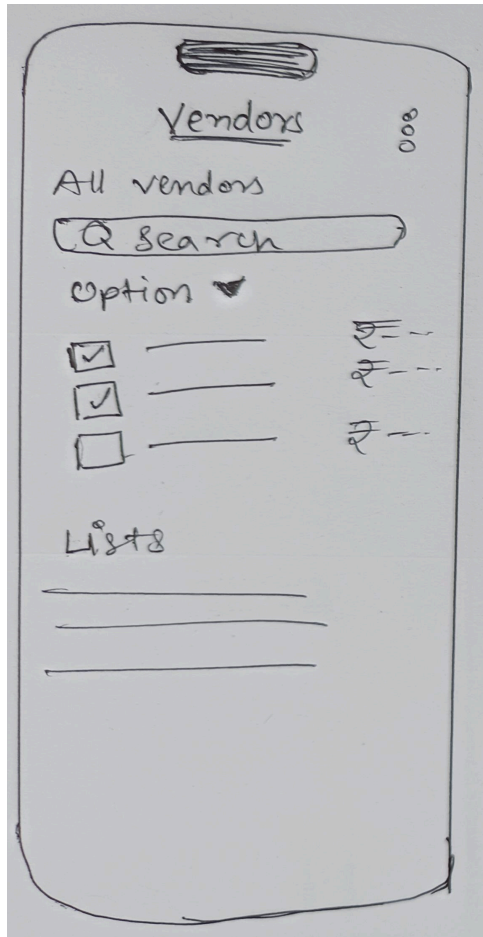

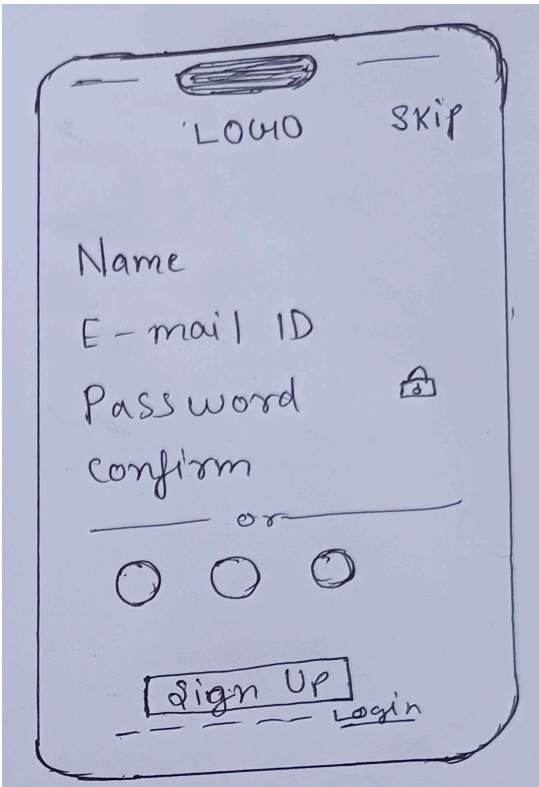

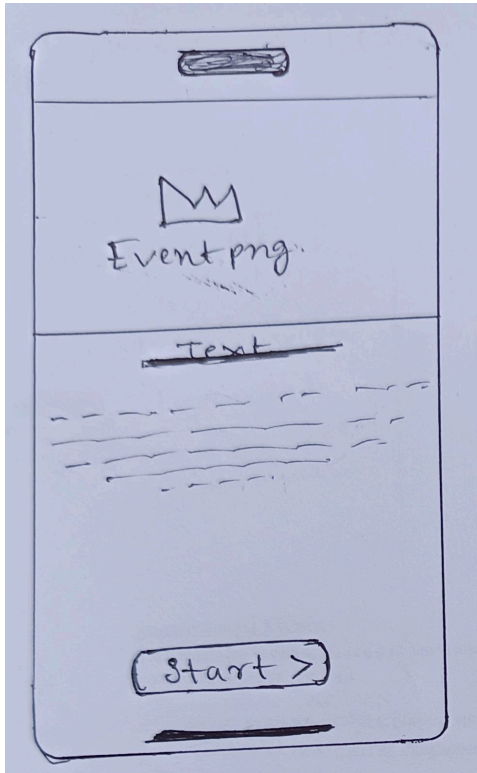

1. Streamline corporate event planning with minimal manual effort.
2. Schedule tasks and track team responsibilities.
3. Customize themes and branding for different types of events.
4. Manage vendors and service providers all in one place.
5. Share real-time updates and invites with team members or clients.

14 | Usability Testing

User Feedback

I conducted a usability review of my high-fidelity prototype to ensure it met the needs of my target audience. I found strengths in the clean UI and structured flow, while also noting areas for improvement like screen density and CTA clarity. These insights helped me enhance the app for a more intuitive and user-friendly experience.

Negative Feedback

- The homepage layout feels a bit cluttered, and key features aren't instantly visible.
- It was hard to differentiate between personal and professional events during event creation.
- There should be more customizable themes for different event types.
- Users found the vendor filtering options limited or slightly confusing.

Positive Feedback

- The app makes organizing events super easy—everything is clearly structured.
- Loved the ability to set reminders and manage schedules all in one place.
- Vendor booking process is smooth, and profile previews are really helpful.
- UI looks clean and colorful, and feels modern and cheerful.
